WIDIA WCE SOLID CARBIDE END MILLS

AFFORDABLE PERFORMANCE

The WCE solid end milling platform packs a combination of high-performance and general-purpose features into one end mill family offered at an affordable price point in both 4- and 5-flute geometries. This small-to-medium shop staple is made to machine small batches

WCE4 4-flute geometry combines the asymmetrical index and variable helix features at an affordable price while ensuring material and application versatility, even on demanding operations like full slots and heavy cuts.

- Diameter range 3-20mm (1/8-1")
- Shank Style: Straight, Weldon
- Corner Conditions: Sharp-edged, chamfered, radius, ball nose
- TiAlN coated, WU20PE grade
- Applications: Side milling, shoulder milling, slotting, helical milling, ramping, plunge milling, 3D Profiling

BUY 2 GET 1 FREE!

Offer valid on any WCE part number. All 3 end mills must be the same part number. Limit 5 part numbers (5 free) per PO. Can not be combined with other offers (i.e. voucher or certificate).

WCE5 New for 2023, 5-flute geometry combines the unequal index features with an elevated 38-degree helix feature at an affordable price to be used primarily in Carbon Steel and Stainless-Steel shouldering/ side milling applications.

- Diameter range 4-20mm (3/16-1")
- Shank Style: Straight, Weldon
- Corner Conditions: Sharp edge, chamfer, and corner radii
- TiAlN coated, WU20PE grade
- Applications: Side milling, shoulder milling, shallow ramping, helical interpolation, dynamic milling
